Win!

Pay your rental invoice enclosed before the due date to automatically go in the draw to win **FREE rental for the 2025 year— three random winners to be chosen.** Simply pay your invoice before 31.1.24 and an account credit will be provided to cover the cost of next years rental charge.

Industry News- 8.5kg / 3.7kg cylinder valves have changed!

The cylinder valves have changed from a **POL** fitting to **LCC27** fitting, which have improved safety features. The LCC27 safety features include an easy-to-use right-hand threaded external connection and a back check valve that must be engaged before gas can flow. This prevents gas flowing if the connection is not tightened correctly. An easy way to identify these cylinders / valves are by the black coloured tap or the external thread.

The new valve is compatible with existing appliance connections as it also has the internal POL thread. Adelaide Hills Gas has a range of new and old style cylinders in our swap cage which will phase out to the new LCC27 valves over the coming years. If you buy a gas appliance with the new connection it will not be compatible with the old valve (refer below diagram).

Adaptors must not be used to connect an appliance with the LCC27 fitting to a cylinder with POL valve. The change from right hand thread on the LCC27 appliance connector to left hand thread on the POL cylinder valve means tightening one side of the adaptor risks creating a new leak at the other end of the adaptor.

Note: Partially filled cylinders can be returned to us for exchange of a full cylinder with the new valve. We also have a range of hose & regulators in store for purchase if you would like to upgrade to the new style LCC27 connection.

Feel free to contact the office if you have any further queries.

Words from the owners:

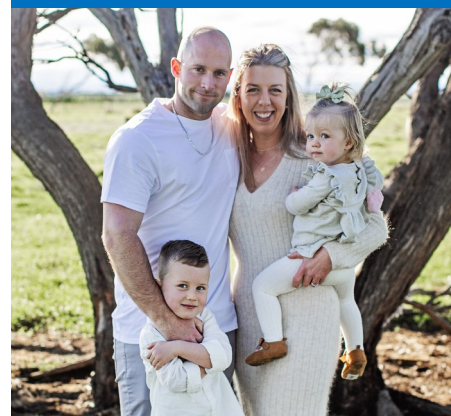

Since introducing ourselves as the new owners back in 2020, our family has grown. Grayson (5) & Tilly (nearly 2) love coming into the shop and 'helping' with the daily chores of running the business as well as being involved with our customers and staff.

Leigh and I have now been working in the industry for 18 years and love serving the local community.

We would like to share that with all the economic cost pressures we are facing, LPG has remained stable. Looking back 5 years ago, October 2018, gas prices are the equivalent as January 2024.

Wishing you all a happy and successful 2024!

Leigh, Bec, Grayson & Tilly Davies

Meet Brian, our senior gas fitter (left) and Sean, our apprentice gas fitter (right).

Did you know we give back to the community by sponsoring all of these local sporting clubs / associations?

- Adelaide Hills Showjumping Club
- Eastern Fleurieu School (Strathalbyn R-6 Campus)
- Goolwa Hockey Club
- Hahndorf Football Club
- Hahndorf Lions Club
- Littlehampton Tennis Club
- Meadows Bowling Club
- Meadows Country Fair
- Milang Bowling Club
- Mount Barker Football Club
- Mount Barker Soccer Club
- Strathalbyn District Basketball Association
- Troy Davies—Angas Go-Karts

Would you like a FREE health check-up on your gas equipment?

As a valued customer of Adelaide Hills Gas, we are offering you a free assessment on your gas equipment, giving you peace of mind that your equipment is sound and compliant. Whether you have recently moved into a house or the system has just been running for the last decade without being checked, it's the perfect way to confirm you're up to date for your own safety.

Regulations have currently changed in relation to LP Gas regulators after an incident involving outdated equipment. The new regulators have in-built over pressure protection which means in the event of it failing it will shut off the supply to appliances preventing direct gas pressure entering your home / business.

The free health check-up allows the technician to come to site and provide the following assessment:

- ✓ Manometer test your system to confirm it's sound and free from any gas leaks
- ✓ Advise condition of current gas regulator and provide recommendations if it requires up-grading or adjusting
- ✓ Check over appliances and provide advice around servicing
- ✓ Offer to generate gas certificate of compliance if relevant
- ✓ General advice around your gas setup

Note anything required to be serviced, replaced or repaired will be generated into a quote. This free assessment will not include any of the repairs, alterations or certificates to be done at the time.

Call today to book your appointment or if you have any further queries.
